ONE-PAGER · FOR MUNICIPALITIES

LED floodlighting for your municipality

The key points for administration and committees on one page.

25 %	40 %	31.12.2027	3000 K
KOMMUNALRICHTLINIE GRANT	FINANCIALLY WEAK MUNICIPALITIES	APPLICATIONS UNTIL	POSSIBLE WITH ALL PRODUCTS

No guarantee of funding. Whether funding is granted, and how much, is decided solely by the funding body. All information is non-binding. We check suitable programmes but cannot promise approval.

Arguments for your meeting

- Electricity: municipal projects report around 40 to over 75% saving with LED. No promise for your facility.
- Old system: there is currently no fixed ban on HQI. The mercury exemption applies until 24 February 2027, and an extension has been requested.
- Neighbours: light control, shields and shorter operating times are effective. This belongs early in the planning.

How it works

1. **Need**
   Clarify use, lighting class and condition of the facility.
2. **Committees**
   Submission on construction, financing and funding application.
3. **Planning**
   Clarify lighting calculation, structural check and building authority.
4. **Funding**
   Submit the application and wait for the decision. No order before then.
5. **Award**
   Product-neutral tender, installation and measurement report.

What you get from us

- Verifiable lighting calculation with real luminaire data
- Datasheets and polar diagrams for the building authority
- Advice on lighting class and regulations
- Delivery, with installation on request
- Check of suitable funding programmes

Experience

75+ sports grounds and 15+ stadiums, including Sportzentrum Sondershausen and Rehberghalle.
